

Inflatable Hair Wash Basin

Features :

- An inflatable basin is not only confined to washing of hair, but may also be used for earhole irrigation techniques, treatments for scalps, and several other hygienic objectives.
- These basins are manufactured from a soft material along with an incorporated support for the neck in order to add more comfort.
- It can be easily inflated by the mouth so you do not have to worry about air
- These sinks basically use internal water collecting systems along with a drain pipe. This pipe goes from the sink to a drainage tank that you can empty by hand.
- The basins are also latex-free to avoid any kind of allergy or water-borne disease.
